

Insignificant Activities (revised 7/17/07)

Several emission sources and activities at the Facility are considered categorically exempt insignificant emission units and activities under IDAPA 58.01.01.317.01.a and as such need not be addressed in this application in accordance with IDAPA 58.01.01.317.01.a(i), and do not require a permit under Idaho Code § 39-115(1)(b). However, units and activities that qualify as “insignificant on the basis of size or production rate” must be listed in the permit application (IDAPA 58.01.01.317.01.b). The following table identifies those emission units that are exempt on the basis of size or production rate.
